

## TENDERING AND ALLOCATION MANAGEMENT

GSM-R / FRMCS / ETCS / ERTMS / TETRA

### The quickest possible, lifecycle-optimised commissioning of the new technology with know-how and independence from the manufacturer

A focus on an all-round approach, functionality and lifecycle costs

Our experts ensure appropriate, smooth and lifecycle-optimised tendering and delivery of a rail system or expansion as a requirement for the introduction of new systems (e.g. ETCS Level 2) or its replacements in the case of a necessary reinvestment.

Our services:

- Establishment of the allocation process with everyone involved
- Determination of the operational and technical requirements
- Definition of the necessary organisational adjustment measures
- As required: execution of wireless network planning
- Drafting of the tender documents with specifications, requirements documents and the necessary contract documents
- Establishment of an evaluation matrix with operational, technical and economic assessment criteria and evaluation of the tenders received with regard to completeness, functionality and price/lifecycle costs
- Formulation of an allocation recommendation

**quattron supports you!** We offer the perfect combination of technical expertise on various rail systems and their economic planning according to the requirements and efficient implementation in the railway system on the basis of numerous projects around the world. Our experts, with almost 20 years of experience in technology projects and applicable innovations from public infrastructure operators, develop a transparent and efficient solution for you!

Our range of services includes comprehensive support for infrastructure operators in the introduction of new, often safety-related technologies.

quattron is your partner for:

- ERTMS
- ETCS
- GSM-R
- FRMCS
- 5G
- Signalling
- TETRA
