

## PROJECT REVIEW

### Efficient project implementation through realistic evaluation of the risks and opportunities within the time and cost constraints!

A focus on completeness, functionality and quality

If a technology or infrastructure project does not achieve the stated objectives, a project review is required in order to create transparency and evaluate the risks within the stated deadline, cost and quality framework taking the available resources and existing framework into account.

Our review service covers the following areas:

- Project planning
- Project organisation
- Reporting
- Risk management
- Contract/supplier management
- Project documentation

**quattron supports you!** Our experts, with almost 20 years of experience in technology projects and applicable innovations from public infrastructure operators, develop a transparent project presentation for you. Using in-depth examination of the individual project areas, taking the necessary available benchmarks and best practices for infrastructure companies into account, we create the structural and procedural conditions for project implementation and achievement of objectives according to plan.

Our range of services includes comprehensive support for infrastructure operators in the introduction of new, often safety-related technologies.

quattron is your partner for:

- ERTMS
- ETCS
- GSM-R
- FRMCS
- 5G
- Signalling
- TETRA
