

## INTEGRATED PROJECT COMMUNICATION

### Ensuring efficient project communication through trustworthy actions and controlled reactions

A focus on coordinated, clear communication paths and early recognition of problems

Major projects are increasingly the focus of politics, the press and the public. Integrated project communication to everyone involved in the project is therefore a key factor in the success of modern project management.

Our services:

- Target group-oriented decision-making concerning communication content and scope of information for all relevant stakeholders
- Establishment of a communication concept
- Ensuring the coherence and credibility of internal communication
- Use of sustainable communication measures

**quattron supports you!** quattron's integrated project communication functions as the interface between technical project content and the stakeholders' need for information. It builds on a close connection with technical experience of the project content and of the various communication methods. Our experts, with almost 20 years of experience in technology projects and applicable innovations from public infrastructure operators, create an integrated communication concept with incident-related measures, even in crisis situations, for you.

Our range of services includes comprehensive support for infrastructure operators in the introduction of new, often safety-related technologies.

quattron is your partner for:

- ERTMS
- ETCS
- GSM-R
- FRMCS
- 5G
- Signalling
- TETRA

THE TECHNOLOGY TRANSFORMER
